

CLIENT ASSESSMENT

MERRITT HAWKINS

Mari Freiberg
Executive Director
Scenic Bluffs Community Health Centers
Cashton, WI

Merritt Hawkins is proud to be the sole preferred partner for permanent physician search of the National Association of Community Health Centers and to assist health centers nationwide with their physician recruiting needs. In the following client assessment, Mari Freiberg, Executive Director of Scenic Bluffs Community Health Centers, evaluates the services Merritt Hawkins provided for her center.

“We partnered with Merritt Hawkins in a search for a family physician who could serve as our Medical Director as well.”

“This was a challenging search due to the small candidate pool, our rural location, our small medical staff and the presence of larger health systems in our area that are offering significant sign-on bonuses. This made it difficult to compete.”

“In assessing the various strengths of the firm, I would point to the client assistance Merritt Hawkins provides. Their consultants helped us determine what was needed for the offer and for the interview. They established good communication with physician candidates and did a great job of ‘selling’ our opportunity. They also provided good wage and benefit comparables so we could put together a good package to offer.”

“Based on our experience I would use Merritt Hawkins again and I would recommend their services to others.”
